TERRATRIKE RELEASES NEW 8 SPEED PATH

Kentwood, MI (February 27, 2009) – TerraTrike announced today the release of an 8 speed version of their highly popular Path model of recumbent trikes. The Path 3-speed was released early last year and quickly became the most popular trike in the industry.

“When we released the Path last year, it was designed for the person that is looking for a trike to ride the bike paths and trails.” Says Ben Williams, Sales Coordinator at TerraTrike. “With the never before seen price tag of \$999, it was a smash hit right from the start.”

“However, we realized that there were many people who needed a few more gears, but didn’t want to step up to our higher end models which have 24 or 27 speeds” Says Williams. “We think this 8-speed Path is a comfortable step between the 3-speed and our Cruiser and will give the customer more choices when deciding on which trike is right for them.”

The Path 8-speed will retail at \$1199 and will be available mid March through their extensive dealer network or online. Pre-orders are being taken now as they suspect the initial batch will sell out quickly. The 3-speed path will still remain in their line and retails for \$999.
